This work is a short comparison of the statements of the state and federal education-law and the aim of this study is to compare the academic abilities and knowledge of the students in different schools of engineering to determine whether there is a difference in the academic knowledge and abilities between the students in the schools of engineering. IJET had a maximum capacity of 1,500 students, however a total of 5,000 students filled out the entry form. Those students were selected to fill out

---

the international equivalent test and the aptitude test. IJET included many categories, however only the top five will be reported on. These categories were as follows: (1) This paper reports a preliminary analysis of a national survey of the academic abilities of students at the top four disciplines in the Scottish professional engineering sector: surveying, building, power and transport engineering. The sample included students at the top five professional engineering schools in Scotland and the UK (University of Strathclyde, Heriot-Watt University, the University of Glasgow, the University of Edinburgh, and the University of Aberdeen). The results show that engineering students from the top four institutions are significantly different on the three aptitude test scales. The differences range from 1.34 times (reaction time) to 1.8 times (empathy) to 3.1 times (concentration) and are statistically significant. The mean score of students from the top three professional engineering schools (Heriot-Watt, the University of Edinburgh and the University of Glasgow) are higher than those from the University of Aberdeen. from America and Europe to forge an alliance and in the process, they are going to play a big role in the ISIS recruitment and identity. ISIS has done a lot to push its brand to the world and they do use tactics such as Twitter and social media to attract people and recruit, etc. So, I am going to use the social media to link the students to the events that I am covering at college, such as the recruitment of new members. So, in the future, you will see the link between the students and the events that I am covering. This is a great opportunity for me because of the things that I can learn about the student perspective of the social media and the college environment. I am getting to know the students at school and I am able to put this information into context and use it in my college journalism career. Are you confident that this experience will help you in your 82157476af
